MEMORANDUM FOR: Deputy Director for Administration

STATINTL

[Redacted]
Special Assistant to the DCI for Compartmentation

SUBJECT: Letter of Appreciation

1. This memorandum is to commend and thank the several people in the DDA who have been responsible for the excellent progress in building the Central Access Registry (4C) for management of SCI access approvals throughout government and industry. I regret that some of those whose time and energy were contributed to this effort may have been overlooked in preparing this memorandum.

2. It is clear that the effort has involved the Offices of Data Processing, Communications, Logistics and Security and that from my view the effort has been a model of mutual support and cooperation from office directors downward. When problems have arisen, they have been promptly and effectively resolved. Schedules have been and are being met.

STATINTL 3. I am particularly grateful to [Redacted] and to [Redacted] in UDP who designed the system and who have been responsible for its progress thus far.

4. Please convey my thanks to all of the DDA employees who have worked at this task, as well as my hope for their continuing success with it.
